AUSTRALIA, EAST COAST—INNER ROUTE.

Shoal eastward of Howick island.

THE British Admiralty has given notice (No. 187 of 1900) that the Master of the S.S. *Karaveera* has reported that his vessel touched on a shoal with a depth of about 12 feet over it, and said to be situated with the summit of Howick island (186 feet) bearing W. by N. $\frac{1}{2}$ N., distant $7\frac{1}{2}$ miles. The incident occurred at night.

In 1858 H.M.S. *Megara*, when running for an anchorage under Howick island, passed about 200 yards northward of what appeared to be a pinnacle rock on which the depth was estimated to be 6 feet, and stated to be in a position with the southern Howick island bearing W. $\frac{1}{2}$ N., distant $4\frac{1}{2}$ miles. As a subsequent search failed to find this rock, it was removed from the Charts.

Although the area in the vicinity of these dangers has been recently re-examined by H. M. Surveying Vessel *Dart* without success, it would appear very probable that a shoal exists, and it has been therefore temporarily placed on the Admiralty Charts midway between the two positions and marked "*Megara P. D.*," in approximately lat. $14^{\circ} 33' 10''$ S., long. $145^{\circ} 5' 25''$ E.

(Variation 6° Easterly in 1900.)

This Notice affects the following Admiralty Charts:—*Hope islands to Turtle group*, No. 2923; *Turtle group to Claremont point*, No. 2922: Also *Australia Directory*, vol. II, 1898, page 363.

CHINA SEA—VEREKER BANK.

New bank reported south-west of Vereker bank.

AUSTRALIA, EAST COAST—INNER ROUTE.

Shoal eastward of Howick island.

THE British Admiralty has given notice (No. 187 of 1900) that the Master of the S.S. *Karawera* has reported that his vessel touched on a shoal with a depth of about 12 feet over it and said to be situated with the summit of Howick island (186 feet) bearing W. by N. $\frac{1}{2}$ N., distant $7\frac{1}{2}$ miles. The incident occurred at night.

In 1858 H.M.S. *Megara*, when running for an anchorage under Howick island, passed, about 200 yards northward of what appeared to be a pinnacle rock on which the depth was estimated to be 6 feet, and stated to be in a position with the southern Howick island bearing W. $\frac{1}{2}$ N., distant $4\frac{1}{2}$ miles. As a subsequent search failed to find this rock, it was removed from the Charts.

Although the area in the vicinity of these dangers has been recently re-examined by H. M. Surveying Vessel *Dart* without success, it would appear very probable that a shoal exists, and it has been therefore temporarily placed on the Admiralty Charts midway between the two positions and marked "Megara P. D.," in approximately lat. $14^{\circ} 33' 10''$ S., long. $145^{\circ} 5' 25''$ E.

CHINA SEA—VEREKER BANK.

New bank reported south-west of Vereker bank.

THE British Admiralty has given notice (No. 185 of 1900) that a sounding of 32 fathoms, fine sand and blue mud, was obtained to the south-westward of Vereker bank in approximately lat. 20° 40' N., long. 115° 18' E., and another east of 65 fathoms in approximately lat. 20° 48' N., long. 115° 9' E.

From this it would appear probable that another bank exists in this locality, but as the current experienced by the *Solace* was strong, and observations were not obtained when the bank was struck, its position must be considered doubtful.

AUSTRALIA, EAST COAST—INNER ROUTE.

Shoal eastward of Howick island.

THE British Admiralty has given notice (No. 187 of 1900) that the Master of the S.S. *Karaveera* has reported that his vessel touched on a shoal with a depth of about 12 feet over it and said to be situated with the summit of Howick island (186 feet) bearing W. by N. $\frac{1}{4}$ N., distant $7\frac{1}{2}$ miles. The incident occurred at night.

In 1858 H.M.S. *Megara*, when running for an anchorage under Howick island, passed, about 200 yards northward of what appeared to be a pinnacle rock on which the depth was estimated to be 6 feet, and stated to be in a position with the southern Howick island bearing W. $\frac{1}{4}$ N., distant $4\frac{1}{2}$ miles. As a subsequent search failed to find this rock, it was removed from the Charts.

Although the area in the vicinity of these dangers has been recently re-examined by H. M. Surveying Vessel *Dart* without success, it would appear very probable that a shoal exists, and it has been therefore temporarily placed on the Admiralty Charts midway between the two positions and marked "*Megara P. D.*," in approximately lat. $14^{\circ} 33' 10''$ S., long. $145^{\circ} 5' 25''$ E.

AFRICA, EAST COAST—PUNGUE RIVER ENTRANCE.

Buoyage, channels, &c.

THE British Admiralty has given notice (No. 216 of 1900) that the following information respecting the buoyage and channels, Pungue river entrance, is derived from a report, dated 24th February 1900, received from Captain W. S. Rees, H.M.S. *Thetis*:—

- No. 5 buoy. This buoy was found to be then situated with the south extreme of Massique point bearing N. 29° W., distant $2\frac{1}{2}$ miles, and point Jea tower N. 45° E.

Approximate position, lat. $19^{\circ} 55' 30''$ S., long. $34^{\circ} 49' 0''$ E.

The Captain of the port of Beira has also given information, dated 10th February 1900, that on 1st June 1900 the buoyage will be changed to a uniform system as follows:—

Buoys on the starboard side of the channel in entering will be coloured red, and numbered from seaward Nos. 2, 6, 8; buoys on the port side of the channel will

be black, and numbered Nos. 1, 3, 4, 5, and 9. The colour only, not the shape or topmark, is the distinctive characteristic showing on which side the buoy should be passed.

In February 1900, there were, after passing No. 6 buoy, two navigable channels to the anchorage, the western of the two passing close to Massique point and the coast to the northward being the deeper and more intricate. The eastern channel which lies between Nos. 5 and 7 buoys was, however, the one generally used. In it the depth is about 20 feet at high water. The note on the Chart has, therefore, been amended.

CAUTION.—As the banks are liable to change, local knowledge is necessary before attempting to enter.

AFRICA, EAST COAST—PUNGUE RIVER ENTRANCE.

Buoyage, channels, &c.

THE British Admiralty has given notice (No. 216 of 1900) that the following information respecting the buoyage and channels, Pungue river entrance, is derived from a report, dated 24th February 1900, received from Captain W. S. Rees, H.M.S. *Thetis* :—

No. 5 buoy. This buoy was found to be then situated with the south extreme of Massique point bearing N. 29° W., distant $2\frac{1}{2}$ miles, and point Jea tower N. 45° E.

Approximate position, lat. $19^{\circ} 55' 30''$ S., long. $84^{\circ} 49' 0''$ E.

The Captain of the port of Beira has also given information, dated 10th February 1900 that on 1st June 1900 the buoyage will be changed to a uniform system as follows :—

Buoys on the starboard side of the channel in entering will be coloured *red*, and numbered from seaward Nos. 2, 6, 8 ; buoys on the port side of the channel will be *black*, and numbered Nos. 1, 3, 4, 5, and 9. The colour only, not the shape or topmark, is the distinctive characteristic showing on which side the buoy should be passed.

In February 1900, there were, after passing No. 6 buoy, two navigable channels to the anchorage, the western of the two passing close to Massique point and the coast to the northward being the deeper and more intricate. The eastern channel which lies between Nos. 5 and 7 buoys was, however, the one generally used. In it the depth is about 20 feet at high water. The note on the Chart has, therefore, been amended.

CAUTION.—As the banks are liable to change, local knowledge is necessary before attempting to enter.

AFRICA, EAST COAST—PUNGUE RIVER ENTRANCE.

Buoyage, channels, &c.

THE British Admiralty has given notice (No. 216 of 1900) that the following information respecting the buoyage and channels, Pungue river entrance, is derived from a report, dated 24th February 1900, received from Captain W. S. Rees, H.M.S. *Thetis*:—

No. 5 buoy. This buoy was found to be then situated with the south extreme of Massique point bearing N. 29° W., distant $2\frac{1}{4}$ miles, and point Jea tower N. 45° E.

Approximate position, lat. $19^{\circ} 55' 30''$ S., long. $34^{\circ} 49' 0''$ E.

The Captain of the port of Beira has also given information, dated 10th February 1900 that on 1st June 1900 the buoyage will be changed to a uniform system as follows:—

Buoys on the starboard side of the channel in entering will be coloured red, and numbered from seaward Nos. 2, 6, 8; buoys on the port side of the channel will be black, and numbered Nos. 1, 3, 4, 5, and 9. The colour only, not the shape or topmark, is the distinctive characteristic showing on which side the buoy should be passed.

In February 1900, there were, after passing No. 6 buoy, two navigable channels to the anchorage, the western of the two passing close to Massique point and the coast to the northward being the deeper and more intricate. The eastern channel which lies between Nos. 5 and 7 buoys was, however, the one generally used. In it the depth is about 20 feet at high water. The note on the Chart has, therefore, been amended.

CAUTION.—As the banks are liable to change, local knowledge is necessary before attempting to enter.

RECOMMENDATION TO BE MADE BY THE DISTRICT BOARDS OF THE ORISSA DIVISION FOR THE NOMINATION OF A MEMBER TO THE BENGAL LEGISLATIVE COUNCIL.

No. 2730A.

RESOLUTION.

APPOINTMENT DEPARTMENT.

Dated Calcutta, the 16th April 1900.

THE appointment of the Hon'ble Raja Shashi Shakhareeswar Roy Bahadur, of Tahirpur, who was appointed to be a member of the Bengal Legislative Council as the representative of the District Boards of the Rajshahi Division, will expire on the 16th June 1900. According to the rotation sketched in paragraph 5 of the Resolution of this Government dated the 25th March 1893, it will be the turn of the District Boards of the Orissa Division to recommend a person for nomination to the Council in order to fill the vacancy. The necessary notification will, therefore, now be published in the *Calcutta Gazette* specifying the District Boards from which a recommendation will be made to the Lieutenant-Governor for nomination to the seat. Each District Board will elect one representative only, and he will be entitled to exercise all the votes of the body which he represents.

2. The following statement shows the District Boards which will send delegates to vote for a person to be recommended for the vacant seat, and the number of votes assigned to them according to the scale shown in paragraph 5 of the Resolution of this Government, No. 2307 A., dated the 31st March 1897. The ordinary income taken is that for 1898-99:—

Division.	District Board.	Ordinary income Rs.	Number of votes to be recorded by the re- presentatives.
Orissa	{ Cuttack	... 1,14,959	2
	{ Balasore	... 71,989	1
	{ Puri	... 56,706	1

3. Under Rule IV of the Regulations framed by the Governor-General in Council with the sanction of the Secretary of State under section 1 (4) of the Indian Councils Act, 1892, for Bengal, the Lieutenant-Governor now desires that the Commissioner of the Orissa Division will at once address the Chairmen of the District Boards enumerated in the above list, requesting them to convene a special meeting of their Board at which one member of the Board may be selected to represent them for the purpose of making the recommendation for the seat in Council. The name of the representative so selected must be reported at once by the Chairman to the Commissioner of the Division.

4. The period of two months laid down in Rule VII of the Regulations as that within which a recommendation shall be made to the Lieutenant-Governor will run from the date on which the Commissioner of the Division issues his request to the Chairmen of the District Boards.

5. As soon as the representatives have been selected, they will be called upon by the Commissioner of the Division to meet together on an early and convenient date, with special reference to the limit of time imposed under Rule VII of the Regulations, and at such convenient place as he may specify, for the purpose of electing, by a majority of votes, a person whom they will recommend to the Lieutenant-Governor to be nominated as a member of the Council. The names of all candidates put forward at such meeting shall be duly proposed by one of the representatives present. The election shall be by ballot, and the person elected must obtain a majority of the votes of the representatives present. If on the occasion of the first ballot an absolute majority is not obtained, the candidate who obtains the least number of votes shall be withdrawn from the election, and another ballot shall then be held for the remaining candidates, and so on, until an absolute majority is obtained. In the event of a tie occurring at any stage, candidates shall draw lots.

6. The electoral representatives present at this meeting shall elect one of themselves to be Chairman, and he shall preside and be responsible for the fair and proper exercise of the ballot vote.

7. The Chairman of the meeting shall without delay report to the Commissioner of the Division the name of the person elected, with the number of votes obtained, and any other information which it may appear desirable to communicate, and on behalf of the meeting shall recommend to the Lieutenant-Governor to nominate for the Council the person so elected. The Commissioner shall submit the report from the Chairman of the meeting, with any observations he may wish to add, to the Chief Secretary to Government, by whom the recommendations will be submitted to the Lieutenant-Governor.

8. Attention is drawn to the following Rule VI of the Regulations which have been framed by the Governor-General in Council and Secretary of State:—

VI.—It shall be a condition in the case of any person to be recommended by a Municipal Corporation, or group of Municipal Corporations, that he shall be a person ordinarily resident within the municipality or the district in which it is situated, or in some one of the municipalities constituting the group or of the districts in which they are situated. A similar condition shall also apply to persons to be recommended by District Boards.

Under this rule it is not necessary that persons recommended shall be members of any District Board concerned, but they must be ordinarily resident within the Division from which the recommendation is made. Subject to this condition, the rules declare no limit of qualification, and it is left to the

representatives to recommend a person under Rule V (c) according to the majority of their votes.

9. It is desirable that the subsidiary arrangements now sanctioned shall, as far as possible, be given effect to by the District Boards concerned with the minimum of official interference. The Divisional Commissioner and the District Magistrates will, of course, afford any assistance which may be required, and will do their utmost to facilitate the smooth working of the elections; but Government officers are forbidden to take part, directly or indirectly, in the election by canvassing, influencing votes, or otherwise interfering with the free choice of the District Boards. No indication should be given by any official member of any of the District Boards concerned as to the manner in which he himself intends to vote.

ORDERED that a copy of this Resolution be furnished to the Commissioner of the Orissa Division for information and guidance, and for communication to the District Boards in his Division.

Ordered also that a copy be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

J. A. BOURDILLON,

Offg. Chief Secy. to the Govt. of Bengal.

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS
TAKEN IN ASSAM, FOR THE MONTH OF MARCH 1900.**

DURING the early part of March fine settled weather generally prevailed over the province and the Bay with winds variable in direction and below normal strength. For a few days the cold season distribution of pressure, with westerly or north-westerly winds, was restored, and temperature was in consequence below the normal by several degrees at that time. Owing to the variable conditions accompanying the change from southerly to northerly winds, a few local storms with light scattered rainfall occurred in the south-western districts, mostly in Orissa and the south of Chota Nagpur, but the falls were in all cases so light that they scarcely influenced the total fall for the month.

During the latter half of the month weather underwent a marked change, and became unsettled to an exceptional extent. This exceptional character was not so much in the severity of the disturbance, but in the fact that it continued with little intermission till the end of the month. Very little rain fell in Bihar or in Chota Nagpur. Towards the east, however, rainfall increased in amount. It was practically normal in East Bengal and was heavy in Assam, especially in the south. Silchar received more than 12, Sibsagar and Dhubri more than 4, while the average fall in East Bengal was 2.5 inches. The only other average fall of more than 1 inch was 1.42 inches in Orissa.

While pressure remained low over the province during the latter half of the month, the gradient was steep over the north of the Bay, and strong winds prevailed in the north-west angle. Temperature was generally above the normal, so that, though there was a relatively cool period earlier in the month, the mean temperature for the whole month was above the normal in all divisions. Excess in Orissa was about 1° , in Bengal Proper and Bihar between $1^{\circ}5$ and 2° , and in Chota Nagpur more than 3° . In Assam, where rainfall was more heavy, there was cool weather, and average defect of 1° .

At the beginning of the month the pressure distribution was uniform over the whole area, but somewhat higher over the Bay than over the province, the lowest readings being in Bihar. The difference from the normal was small at all stations, and comparatively cool weather with light southerly winds prevailed. As pressure was falling moderately in the west of the province, there was some appearance of an approaching depression which was shown in a very irregular form over the central districts on the 2nd after a continued moderate fall of pressure. On the 3rd pressure rose in the north-east, and the gradient became steep in Bihar with north-easterly winds and an irregular cyclonic circulation over the western districts. But these changes were of no importance, as the shallow depression moved eastward without influencing the general weather conditions to any noticeable extent. The brisk rise of pressure which followed continued with slight interruptions till the 11th, when readings were highest in the west of Bihar and lowest in the south of Burma, and northerly winds prevailed over the whole area.

The light scattered showers which fell during these days in Lower Bengal and Orissa were probably due to the interaction of the light variable winds following the irregular pressure changes. The showers on the 11th are most difficult to account for otherwise because pressure was steadily, though slowly, rising about that time and the prevailing directions were northerly, circumstances which are rarely attended by local disturbances of any kind.

With the northerly winds temperature fell, and was generally in defect by variable amounts up to 4° . After the fall in pressure began on the 12th, winds became southerly and temperature rose. The change of pressure was most rapid on the 14th, when the fall varied from .07 inch in the south-east to .15 inch in the west of Bihar, but the total fall in the west of the province between the 12th and 14th was very little under .3 inch. The pressure distribution which then developed continued with little modification for some days. The most noticeable features were great uniformity over the Bay, except in the north, and a steep gradient over the province. The isobars ran from north to south, and strongish southerly or south-easterly winds prevailed in Bengal Proper. Towards the west they were northerly and at times westerly, and with this cyclonic arrangement thunderstorms occurred with scattered rainfall.

Showers began in North Bengal about the 17th, and continued to be fairly general, though not heavy, till the 21st or 22nd, when they became more general, especially in East Bengal. The heaviest rainfall of the month was in Noakhali and Chittagong on the 22nd, when many of the registering stations received 1 and some more than 2 inches.

The changes of pressure about the 20th showed that a shallow depression crossed the province at that time, and the temperature changes show that the rainfall began in the north-east and spread south-westward. On the 19th temperature was below the normal in Assam only; on the 20th the area of relatively low temperature included North Bengal, and on the 21st it had extended to East Bengal, while on the last date there was a recovery in Assam. Throughout high temperature continued unchanged in the west of the province.

Pressure rose briskly on the 22nd, and the area of lowest readings closed up towards the hills. Westerly winds advanced eastward and became general over the province. Rainfall ceased, but only for a day or two, as showers were again fairly general in Bengal Proper between the 26th and 28th. Pressure was unsteady during those days, and there was an

exceptionally rapid rise on the 26th, which appears to have begun in the north-east and caused a shallow depression over the central districts. This depression was well marked on the 27th, and was causing general cyclonic winds, though of only moderate strength. Readings varied from 30·07 inches at Sibsagar to less than 29·95 inches at some of the central stations, showing a steep gradient over Assam and North Bengal. A rapid fall of pressure followed on the 28th, and the distribution was then normal.

The fall in temperature about that time was barely noticeable, as only a few stations in the south-west of the province and some towards the east recorded mean temperatures below the normal. The low temperature in the south-west was probably due to the rainfall in Orissa and the south of Chota Nagpur, where it was more continuous than in other parts of the province. It was of daily occurrence in Orissa, though not general, from the 22nd to the 29th, and the falls were at times fairly heavy; the largest amount was 1·5 inches at Balasore on the 28th.

During the closing days of the month there was still a slight depression over the province, and a steep gradient over the eastern districts, but rainfall had almost entirely ceased.

Pressure.—As stated above, pressure changes were small and of little importance during the early part of the month, but were large at times during the latter half. A shallow depression remained fairly steady over the central districts from day to day with a steep gradient towards the east and south. The means for the month are almost normal, there being a small excess in North Bengal and Chota Nagpur and a small defect elsewhere.

Temperature was low for a short time about the end of the first week, when northerly winds were general, and occasionally for short intervals after thunderstorms in the latter part of the month. The variation from the normal in maximum temperature for the whole month varies from excess of 4° in Chota Nagpur to defect of 2° in Assam. Mean minimum readings were more uniformly high and by about 2°. Average excess for the various divisions varied from excess of 3°·4 in Chota Nagpur to 1° in Orissa. In Assam there was defect of about 1°.

Rainfall was much lighter than usual in March, except in Orissa and East Bengal, which received fairly frequent and in some cases heavy showers towards the end of the month. In the former rather more than the normal amount fell, and in the latter almost exactly the normal 2·5 inches. Bihar was almost entirely rainless, and in Chota Nagpur and South-West Bengal there was only about a quarter of the normal, while in North Bengal there was rather more than half.

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the month of March 1900:—

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 84 formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed at the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.
